Designed Specifically for Chemical Treatment - Excellent for Cooling Towers

The unique circuitry of the CTCII™ Chemical Treatment Controller guarantees accurate and reliable measurements. Drift free performance is assured by “field proven” electronics, including automatic DC offset compensation and highly accurate drive voltage.

Since Temperature Compensation is at the “heart” of accurate water measurement, all Myron L CTCII controllers feature a highly refined and precise TC circuit. This feature perfectly matches the

water temperature coefficient as it changes. All models corrected to 25°C.

Standard on all models are two heavy-duty 10 amp output relays, operating on increasing readings. Bright red/green LED indicates above or below set point values.

All CTCII models feature a compact IP65/NEMA 4X water resistant and corrosion proof rated enclosure 4.7 x 6.3 in./120 x 160 mm. They are suitable for bench or surface mounting.

4 MODELS TO CHOOSE FROM*:

- CTCII
- CTCIIT (with Limit Timer)
- CTCIID (with 3½ Digit LCD)
- CTCIIID (with Limit Timer & 3½ Digit LCD)
