* **Continuous Flow:** The size of meter selected should be based upon continuous flow, GPM, as opposed to pipe size. For example, if it is determined that continuous flow is 25 GPM, a 1" meter should be selected rather than a 3/4" meter.

ORDERING INFORMATION: Specify model number shown followed by choice of contact setting desired. Example: 3/4" meter, 1" pipe size, 10 gallons per contact = JSJ0751MT 10 GPC.

Helpful Hints:

1. Install a Carlon slow-closing valve downstream of your water meter.
This will eliminate possible meter damage from water hammer in your system.
2. Install a Carlon strainer upstream of your water meter to protect the meter and any other in-line process equipment from becoming jammed by particulate matter in your system.
