Gemini™ Dual Wall Tank Systems

Cylindrical and Square Model Tank Systems

GEMINI DUAL TANK SYSTEMS - GEMINI DUAL TANK SYSTEMS - GEMINI DUAL TANK SYSTEMS - GEMINI DUAL TANK SYSTEMS - GEMINI D

Features and Benefits of Gemini Tank Systems

- All Peabody Gemini tanks made from LLDPE and HDLPE are available WQA Gold Seal NSF/ ANSI 61 compliant.
- Linear polyethylene (LLDPE & HDLPE) construction. Polypropylene (PPL), HDXLPE and PVDF available - Superior chemical resistance for acids, caustics, sodium hypochlorite, biocides, etc. Handles aggressive applications that stainless steel will not.
- Durable dual wall construction - Standard tanks rated 1.5 SPG, 1.9 SPG heavy duty available. "Tank in a Tank" design for instances where primary tank fails, the chemical will be safely contained in secondary tank.
- NEW Standard secondary tank leak detection port - for optional leak detection alarm.
- Integral pump mounting platform - Lid has 240 pound rating allowing for use with metering pump or mixer mounted directly to tank dome. Models with sump reservoir collects and drains liquid back to primary.
- Pump pick-up tube port - Install pump suction line with check valve quickly and easily. Once installed, tank contents are sealed from outside environment.
- Integral mouse door - Molded directly into most Gemini models, recessed mouse door allows for inexpensive installation of optional bottom bulkhead fitting for flooded suction connection or bottom fill.
- Custom colors and mold-in graphics - Custom colors available, subject to minimum order quantity. Private label mold-in graphic is molded directly into tank and won't weather, crack, peel, or deteriorate.

Sizes range Gemini Cylindrical from 15 to 500 gallons
and Gemini Squared from 5 to 120 gallons

Corrosion Resistant Construction

Wide Range of Sizes

Gemini Tanks are available from 5 to 500 gallon capacities. Other styles and sizes of Dual Containment Tanks are available up to 10,500 gallon capacities.

Standard Fittings

Gemini Tanks come standard with vented twist lid, pump suction pick up port and return drain built into pump mounting shelf, and connection fittings standard on dome top.
